PROJECTS

Tender Management System - Enterprise Programming	Jun 2023 - Present
My team and I are currently engaged in the development of a comprehensive tender management system. Our goal is to streamline and simplify the process of applying for tenders, thereby making it more accessible and efficient for all parties involved	
Automobile Management System - MERN Stack	Dec 2022 - Apr 2023
My team and I have successfully developed an automobile management system utilizing the MERN Stack. Our system is designed to facilitate the search and purchase of car-related products and services, providing users with a seamless and efficient experience

Entertainment Management System - Django	Jul 2022 - Dec 2022
My team and I have developed a sophisticated entertainment management system using the Django framework, which is part of the Python stack. Our system is designed to streamline the process of booking and managing events, providing users with a seamless and efficient experience. With our system, users can easily search for, book, and manage events, ensuring a hassle-free and enjoyable experience.
